

JPN Government Minister of Land, Infrastructure, Transport and Tourism  
certified as the “Non-combustible Material” NM-0996

Large, bold black calligraphic characters for '和紙' (Washi) are overlaid on the background. The background consists of several sheets of textured, light-colored paper, some of which are slightly crumpled or layered.

**CELL-FUNEN'S  
NON-COMBUSTIBLE  
“WASHI” ORIENTAL PAPERS**

“The beauty and strength of Oriental paper is now  
combined with its resistance to burning.”

Third-party available Oriental paper can also be made  
into incombustible by post-processing.

**ASANO FUNEN(NON-COMBUSTION) Co.LTD.**

# Making handmade Japanese paper Non-combustible

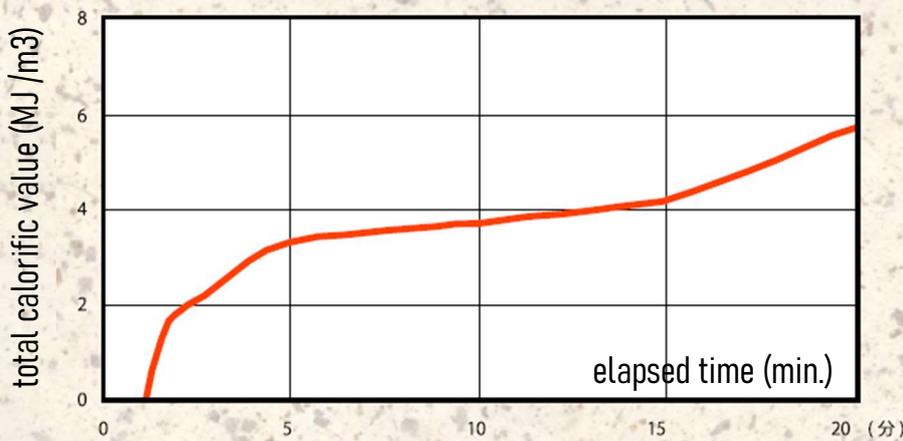

- ① Even in places with legal restrictions, you can create a luxurious space with the unique texture of Japanese paper.
- ② We will consult with you about making the Oriental paper of your desired design non-combustible.
- ③ Has insect repellent, anti-fungal and anti-bacterial properties

## Excellent Non-combustibility

Even if it is exposed to flame, it will only be carbonized, and create no flame and smokes and the fire will not spread.

### Pyrogenic test with cone calorimeter

Comparison of experiment setting a fire  
(Left: Cell-Funen treated / Right: Plain)

\* The base uses legal non-combustible materials, excluding metal plates.  
Non-combustible material certification is for the wallpaper.

### Application examples

#### Wallpaper:

Stores, residences, art spaces, etc.

#### Fittings:

Fusuma, Shoji screens, etc.

#### Others:

lighting covers, partitions, etc.
